

**REQUIREMENTS FOR USING HWH® ENVIRONMENTAL AIR SEALS  
and  
Limited Warranty Information**

- Air seal gap around room must be maintained at no less than 3/8" and no more than 1/2".
- Maximum air seal pressure can be no more than 12 psi.
- HWH® provides the controls including a regulator and vacuum assembly for each air seal assembly.
- Training is necessary to successfully install our air seals.
- It is recommended that rooms are designed to move into the vehicle for air seal placement. Typically, the room must move at least four inches into the vehicle (from the normal retracted position) to allow for seal replacement from the outside.
- Limited Warranty on air seal is **one (1) year** due to HWH® manufacturing defects or material defects.
- HWH® will provide the air seal and pay eight (8) hours labor to replace it.
