

HWH® Integrated Control Console Designed for Class C Motorhomes

A great leveling system at a great price!

The HWH 225 Integrated Control System is pre-plumbed and wired for easier installation. Above floor installation allows for more flexible installation while accommodating manufacturer's design and construction that is common on Class C motorhomes.

Features...

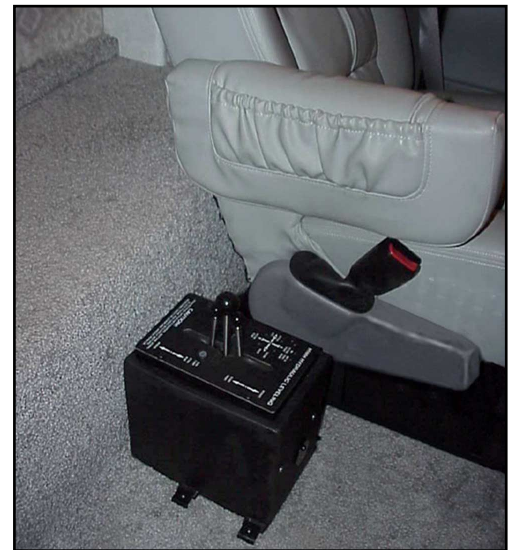

- Above floor mounting allows for Class C installation and easier operation.
- Hydraulic hoses are pre-plumbed onto the valve and are mounted inside the console box.
- Electrical connections are pre-installed inside the console box.
- New Electronic Level Sensing Unit is pre-installed inside the console box.
- Console raises the control valve to a more convenient operating height.
- Box is manufactured of a high strength polymer with an anti-scuff, textured finish.

Contact your local HWH Dealer or HWH directly for more information on the **HWH 225 Integrated Control System**.

HWH Integrated Control Console conveniently mounted near the driver's seat. ▶
