## Makes Adding Levelers To Your Class A

## As Easy As 1, 2, 3

**STRONG, RELIABLE, HYDRAULIC POWER**

# HWH Leveling Systems not only level your RV, they minimize RV sway/rocking caused by interior and exterior forces.

HWH® is the established leader and pioneer in RV leveling systems. HWH® is chosen by more RV manufactures and consumers than any other brand, because:

- of their reliable and easy operating systems.
- hydraulic power is strong, durable and low maintenance.
- HWH® BI-AXIS® leveling operates jacks in pairs, minimizing twist to coach structure which can cause damage.

HWH® manufactures straight-acting and kick-down jacks in a broad range of capacities.

The straight-acting jacks feature rigid deployment with larger footpads to resist sinking into soft ground. Newer Ford and Workhorse Class “A” coach chassis have mounting holes for HWH® straight-acting jacks.

Kick-down jacks can be installed in tight situations or on most older Class “A” coaches.

Hollow jack rods are manufactured to be stronger and more corrosion resistant than any other brand.

Weather tight electrical connections, sealed warning switches, custom engineered seals and plug-in harness connections ensure a reliable system.

Spring powered jack retraction prevents becoming stranded with your jacks down, in the event of a hydraulic or electrical power failure. Springs also prevent jacks from drifting down during travel.

*Only HWH® speeds leveling with the exclusive, easy-to-use Levelze™ light system.*

*Its built-in logic guides you through the leveling process.*

**HWH® Straight-Acting Power-Extend/Spring-Retract Jack**

**HWH® Kick-Down Power-Extend/Spring-Retract Jack**

**Choose the control panel option that best suits your leveling needs. Joystick, Touch Panel or Computerized.**

← Fully-automatic 725 Series (Computer-Controlled) touch panel is usually floor mounted. (Optional dash bezel available).

Joystick-Controlled 200 Series control panel conveniently mounts to the floor. →
