

The HWH[®] SpaceMaker[®]

Full-Wall Hydraulic Room Extension

(with HWH[®] Synchronizing Cylinder)

Full-Wall Room Extension System Features and Benefits

- Weight carrying capacity to 6,000 pounds, equally spread.
- Mechanisms allow for straight-out or level-in-level-out floor.
- Extensions for above-floor or below-floor mounting.
- Slide mechanisms utilize a four-point attachment, which draws all four corners in for a positive seal whether the room is extended or retracted.
- The HWH Synchronizing Cylinder allows for smooth, even extension and retraction of the room.
- Self lubricating bearings allow for long life.
- Can be used on any length room.
- Wheelchair Friendly. Room floor is level when the room is in the extended or retracted position allowing accessibility for wheelchairs.
