

Creating “New” Coaches

The Active Air Suspension can give motorhome owners an improved RVing experience with a more comfortable and enjoyable ride on new and old motorhomes alike. The four-point electronically controlled suspension system provides ride comfort by rapidly adjusting the suspension system toward proper height. It senses and offsets lean for a more relaxing ride, whether on windy roads or winding paths. This technology not only allows RVers to take the scenic, curvy route, but it can also make older coaches drive like new...or better than new! At least that was the experience of Jim and Tori Kelso.

“Active Air saved us thousands of dollars! While we were very happy with our 1995 motor coach, there were a few things that were showing their age. After test driving a few newer coaches, we knew our coach’s ride and handling were not quite up to par. Additionally, the exterior was showing its weathering (storing it in the Arizona sun sure didn’t help). Pricing was discussed with the many variables and we were ready to go for it until we saw an Active Air ad and decided there might be another way to go.

With that in mind, we repainted the coach with newer graphics and drove to HWH in Iowa to have Active Air installed. We figured that since our coach looks like new, why not have it drive like new?

The ride home to Phoenix was on two lane highways most of the way, encountering many, many oncoming trucks (and passing ones as well) along with very strong side winds. Prior to the Active Air

installation, the ride was very tiring, requiring constant two-handed steering with continuous correction. With Active Air, driving was simply a pleasure – even better than we had expected, even better than the new coaches we’d test driven! In fact our normal driving speeds increased slightly because of this superior stabilization.

Buying livability and comfort are some of the reasons we own our motorhome. Active Air should definitely be considered by anyone truly wanting to make a noticeable upgrade to their coach!

Thanks to HWH, we’re looking forward to many more years of use out of our “new” 1995 motor coach! ”
