

HWH

The Look of the Future!

Precision Landing Gear and Leveling Systems

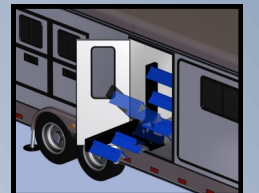

Components are available in various sizes to equip the smallest to the largest trailers.

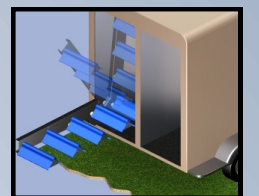

HWH Hydraulic

Saddle Rack

No more reaching up!

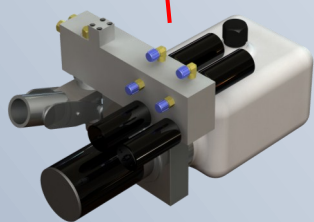

Side Tack Room

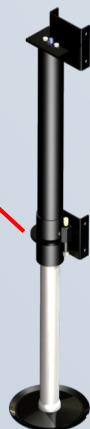

Rear Tack Room

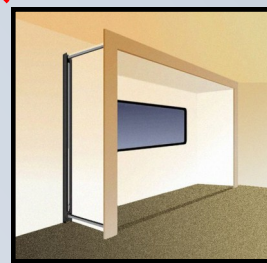

Weather resistant metal box with sealed switches for a long life.

Backup pump is fast, easy and powerful.

Anti-corrosive rods prevent rust. (Rust eats jack seals.)

Slideouts utilize a four-point attachment, which draws in all four corners for a better seal against the elements.

Rear jacks may be added for full leveling.

Only one multi-purpose power unit is needed to run all HWH equipment.

Landing Gear | Leveling System | Room Extension Systems | Saddle Rack

Precision Aircraft Style Jacks Provide "The Look of the Future!"

Jacks can be used as landing gear or in combination with other jacks to make a complete leveling system. Provides exceptional stability.
