

HWH[®] Sprinter Leveling System With HWH[®] Aftermarket Brackets

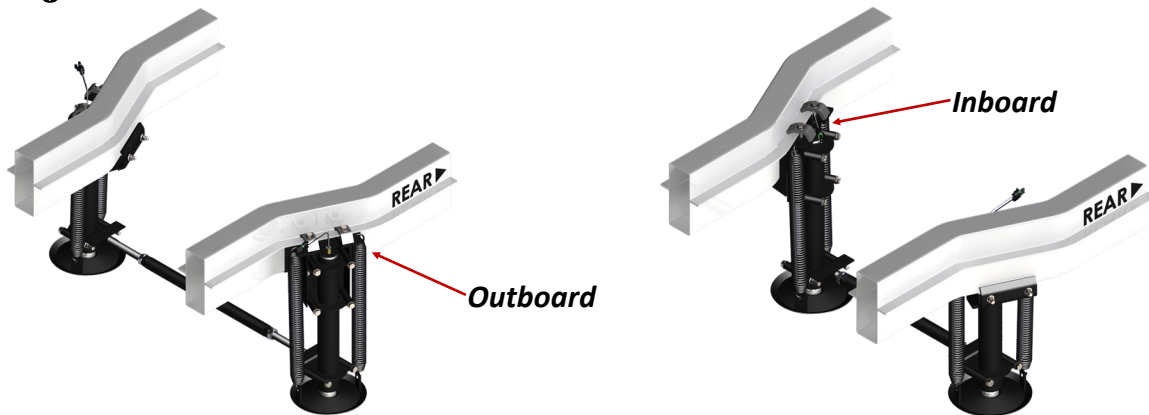

Automatic leveling for RVs built on the popular Sprinter Chassis

Owners of Class B RVs built on the Sprinter Chassis can enjoy the benefits of computer-controlled, automatic leveling used for Class A and bus-style RVs. The single-step touch panel is easy to operate and the telescoping jacks are specifically designed to fit this chassis' low-profile design. The jacks are very compact with a long 13" stroke.

Easy To Install - No Welding - Clamp On Design

Rear jacks can be mounted Inboard or Outboard
