Leveling Systems

Single-Step Automatic Leveling

ml55894tp_005.doc | 24SEP15

Smart, quick Single-Step Computer-Controlled Leveling with the touch of one button.

The computer automatically selects the fast and efficient way to level and stabilize the vehicle with minimum flexing of the coach structure.

Leveling and stabilizing the vehicle is accomplished in approximately one to three minutes, varying for different leveling situations.

For the coach owner that enjoys total control, HWH has included the standard option of manual leveling with the Leveleze® Indicator Light System.
